

SHAYAAN ZAKA

New York, New York

📞 646-221-1199 ✉️ shayaanzaka.work@gmail.com 🔗 [linkedin.com/in/shayaanzaka](https://www.linkedin.com/in/shayaanzaka)

Education

New York University

Master of Science in Management of Technology

September 2024 – May 2026

New York, United States of America

Birla Institute of Technology

Bachelor of Technology in Computer Science and Engineering

July 2018 – May 2022

Ranchi, India

Experience

Entrepreneurs of Tomorrow

Product Analyst Intern

August 2025 – Present

New York, United States

- Owned customer segmentation and upgrade propensity analysis, advising leadership on retention and personalization strategy for cohorts responsible for 63% of total revenue.
- Applied RFM segmentation, K-Means clustering, and logistic regression to prioritize high-value users and inform targeted engagement decisions.

Dentsu Global Services

Analyst

July 2022 – February 2024

Bengaluru, India

- Owned development of a production-grade ELT platform using Airflow, BigQuery, dbt, and GCS, delivering analytics-ready star schema models consumed by product and finance teams.
- Enabled reliable, scheduled data transformations via containerized dbt deployments on Cloud Run with secure service-to-service orchestration.
- Implemented CI/CD and infrastructure-as-code using Cloud Build and Terraform, enabling automated, repeatable deployments across environments.
- Reduced manual reporting effort by 60% while improving data trust through embedded testing and certified fact and dimension tables.

Cognizant

Programmer Analyst Intern

December 2021 – May 2022

Bengaluru, India

- Analyzed end-to-end e-commerce funnels to identify an 85% cart-to-purchase drop-off, highlighting critical friction points impacting conversion efficiency.
- Used SQL (CTEs, window functions) and Python to model stage-wise conversion and quantify leakage across user journeys.
- Recommended UX and trust-based improvements, laying groundwork for future churn and retention modeling initiatives.

Projects

Time-Series Forecasting of Environmental Data Using Statistical and Neural Network Models 🧠

- Built statistical (ARIMA) and neural network (LSTM) forecasting models to evaluate short-term trend predictability in environmental time-series data.
- Improved forecast accuracy by 22% (RMSE), demonstrating the impact of deep learning models for decision-making under temporal uncertainty.

Skills

Analytics Engineering & Data Modeling: Python, SQL, dbt, Apache Airflow, ELT Pipelines, Data Modeling, Star Schema Design, Metric Layer Design, CI/CD, ETL/ELT Architecture

Cloud Platforms, Infrastructure & Warehousing: Google Cloud Platform (BigQuery, GCS, Cloud Run, Cloud Build), AWS, Terraform, Infrastructure as Code, BigQuery, Snowflake, Redshift, Spark SQL, Hive, Presto, Trino

Statistical Analysis, Experimentation & Forecasting: Customer Segmentation, RFM Analysis, K-Means Clustering, Logistic Regression, A/B Testing, Experimentation Design, Time-Series Forecasting (ARIMA, LSTM)

Machine Learning, Data Science & Analytics Libraries: Scikit-learn, Keras, Statsmodels, Pandas, NumPy, Seaborn, Matplotlib, Natural Language Processing (SpaCy)

Visualization, Reporting & Communication: Tableau, Looker, Power BI, Excel Dashboards, Data Storytelling, Google Slides, PowerPoint

Volunteer Experience

New York Professional Advisors For Community Entrepreneurs

Pro Bono Advisor

October 2024 – December 2024

Remote

- Advised a small business using 18 months of transactional and attendance data, identifying concentration risk where 27% of members generated 71% of recurring revenue.
- Developed retention and growth forecasts to support planning for 2× scale, informing leadership strategy and resource allocation.
